

# Professional Leadership Attendance Network

**Would you like to build your leadership skills and better engage your district team to improve student attendance?**

**Designed for district administrators**, the Professional Leadership Attendance Network (PLAN) offers an opportunity to learn from experts and organize a clear plan of action in a collaborative learning environment.

**Over one year**, a select group of administrators will have the opportunity to learn from each other, as well as experts, and develop a plan for action. Attendance Works will offer feedback on your district plan.

PLAN includes:

- **Expert-Led Sessions:** Dive into six dynamic two-hour sessions over a year, guided by leading attendance specialists.
- **Collaborative Learning:** Connect and share insights with a cohort of fellow district leaders, building a powerful network.
- **Actionable Plans:** Develop a clear, strategic plan to tackle attendance challenges in your district.
- **Practical Tools:** Gain access to effective resources and strategies that you can implement immediately.
- **Personalized Coaching:** Receive tailored support and guidance to enhance your leadership and attendance systems.
- **Systemic Improvement:** Be empowered to create lasting, positive changes in attendance across your district.

*"Wow! One of the biggest takeaways for me is the importance of being intentional about identifying both internal and external stakeholders. Our teachers, support staff, administrators, students, bus drivers, secretaries, etc., are at the heart of this work, and making sure they feel seen and valued will strengthen everything we do."*

– PLAN participant

**PLAN launches in October 2025.**
