

Results in the Center

How to use the Results in the Center worksheet:

1. Identify your goal and write it in the center. Example: Reduce 9th grade chronic absence
2. For each section, write down the partners who contribute to this result. If they have greater contact with the students or group in the center, put them closer to the center. If they have less contact, put them farther out.
3. Then, add groups that could contribute to this result.
4. Finally — and most importantly — list the next step your team will take with each partner. Decide who will reach out and by when.
